

Catholic Bioethics for a New Millennium

By Most Rev Anthony Fisher OP, Bishop of Parramatta

Can the Hippocratic and Judeo-Christian traditions be synthesised with contemporary thought about practical reason, virtue and community to provide real-life answers to the dilemmas of healthcare today?

In *Catholic Bioethics for a New Millennium*, Bishop Anthony Fisher OP discusses conscience, relationships and law in relation to the modern-day controversies surrounding stem cell research, abortion, transplants, artificial feeding and euthanasia, using case studies to offer insight and illumination.

What emerges is a reason-based bioethics for the 21st Century; a bioethics that treats faith and reason with equal seriousness, that shows the relevance of ancient wisdom to the complexities of modern healthcare scenarios and that offers new suggestions for social policy and regulation.

Philosophical argument is complemented by Catholic theology and analysis of social and biomedical trends, to make this an auspicious example of a new generation of Catholic bioethical writing which has relevance for people of all faiths and none.

Catholic Bioethics for a New Millennium is published by Cambridge University Press.
